Product Requirements Document

Multi-Brand Patient Experience Management Platform

Version 1.0 | April 14, 2026

CONFIDENTIAL

Table of Contents

1. Product Overview

OttoPulse is a multi-brand patient experience management platform designed for fertility clinic networks. It enables organizations to create and distribute NPS surveys, collect and act on patient feedback, manage online reviews, and maintain a centralized contact database with intelligent deduplication.

Target Users:

- Clinic administrators and operations managers
- Brand managers overseeing multiple locations
- Clinic managers responsible for individual locations
- Front-desk staff and clinical staff

Brands Served:

- Conceptia Fertility
- Generation Fertility
- Grace Fertility
- Olive Fertility

2. NPS Surveys Module

2.1 Event Creation (5-Step Wizard)

Each NPS survey is created as an "Event" through a guided 5-step wizard:

Step 1 — Setup

- **Brand:** Select from accessible brands
- **Locations:** Multi-select from the brand's locations
- **Event Name:** Descriptive name for the survey
- **Metric Question:** Default: "On a scale of 0-10, how likely are you to recommend us?"
- **Intro Message:** Displayed before the survey begins
- **Languages:** Multi-select: English, Spanish, French, German, Portuguese
- **Throttle Days:** Default 90 — prevents re-surveying same contact within N days

Step 2 — Follow-up Questions

Add unlimited follow-up questions, each with:

Question Type	Configuration	Display
free_response	Question text, placeholder text	Open text area
scale	Min/max values, min/max labels	Horizontal numbered scale
select_one	Question text, options list	Radio buttons
select_multiple	Question text, options list	Checkboxes

- Each question can be marked as required or optional
- Show-for filter: choose which score groups see each question (promoters, passives, detractors)
- Feedback tags: create event-specific tags for categorization (e.g., Staff Friendliness, Wait Times)

Step 3 — Consents

- Customizable consent text
- Optional contact fields to collect
- Location selection for response attribution

Step 4 — Thank You Page

Score-based thank you messages (separate for promoters, passives, detractors). Each group can have:

- Custom heading and body text
- Action buttons: Google Review link, custom URL, Facebook, Yelp

Google Review Reminder (optional):

- Configurable delay (hours after survey completion)

- Channel: Email, SMS, or “Survey Submitted Channel”
- Template selection for the reminder message

Step 5 — Review & Publish

- Summary of all settings
- Save as Draft or Publish (sets status to active)

2.2 Question Types — Answer Storage

All answers stored as JSONB array in survey_responses.answers:

Type	Answer Format	Example
free_response	String	"Great staff and facilities"
scale	Number	4
select_one	String	"Recommendation"
select_multiple	Array of strings	["IVF", "Consultation"]

2.3 Multi-Language Support

- Supported: English (en), Spanish (es), French (fr), German (de), Portuguese (pt)
- Translations stored in events.translations JSONB keyed by language code
- Each translation includes: metric question, intro message, question texts, thank you messages, consent text
- Survey UI auto-selects language based on contact’s preferred_language

3. Survey Distribution

3.1 Send Now (Manual)

- Select contacts from the contact list (filtered by brand/location)
- Choose channel: Email or SMS
- Select message template
- Send immediately — creates survey_invitations records with status tracking

3.2 Share & QR

- Generate shareable survey link
- Download QR code for print materials
- Link includes event ID for attribution

3.3 Automated Distribution

Webhook API

- Generate API key per brand
- Configure email and SMS templates
- External systems POST contact data to trigger survey sends
- API key management: create, revoke, view prefix/last-used

SFTP File Import

- Configure connection: host, port, username, password, remote path
- Schedule: frequency (hourly, daily, weekly), timezone
- CSV column mapping (first_name, last_name, email, phone, etc.)
- Email and SMS template selection
- Sync history tracked with per-row success/error/skip counts

Otto Onboard (CNP Triggers)

- Link to CNP triggers defined per brand
- Configure email and SMS templates per trigger
- Triggers fire automatically when patients complete onboarding steps

3.4 SMS Constraints

Character limit: 320 across all components. Real-time character counter shown with warning when approaching limit.

4. NPS Dashboard

4.1 Metrics

- **NPS Score:** Calculated as % Promoters − % Detractors (range: −100 to +100)
- **Surveys Sent / Completed / Response Rate:** Core funnel metrics
- **Score Distribution:** Promoter (9-10), Passive (7-8), Detractor (0-6) with counts and percentages
- **Delivery Issues:** Bounced, throttled, unsubscribed counts

4.2 Visualizations

- Trend charts: NPS score over time (daily/weekly/monthly granularity)
- Score distribution donut/bar chart
- Channel performance table (email vs SMS completion rates)
- Critical feedback section: latest detractor responses requiring attention

4.3 Filters

Global filters from TopNav: brand, location, date range (7/30/60/90 days or custom), event. All dashboard data respects these filters.

5. Responses & Feedback

5.1 Response List

All follow-up question answers displayed with type-aware rendering:

Answer Type	Rendering
Scale	Horizontal bar with numeric value
Select Multiple	Colored pills/badges
Select One	Text with icon
Free Response	Quoted text block

- NPS score badge (promoter green / passive amber / detractor red)
- Contact info, event name, submission date

5.2 Response Detail Modal

- Full NPS score display with all answers
- **AI Categorization:** One-click to send feedback to AI edge function for auto-tagging
- **Manual Tag Assignment:** Dropdown to assign/remove event-specific tags
- **Category Assignment:** Assign feedback categories (separate from tags)
- **Internal Notes:** Add/view notes per response

5.3 CSV Export

Export all filtered responses with columns: contact name, email, phone, NPS score, each question answer, question type, tags, categories, submission date.

6. Sent Logs

Track the full invitation lifecycle:

Status	Description
Created	Invitation record created
Sent	Message dispatched via channel
Delivered	Delivery confirmed
Opened	Recipient opened the message
Completed	Survey submitted
Bounced	Delivery failed (invalid address)
Failed	System error during send
Throttled	Blocked by throttle days setting

Filters: status, channel, event, brand, location, date range. Sortable table with column visibility toggles.

7. Reviews Module

7.1 Current Capabilities

- Aggregate Google Reviews per location
- Display: reviewer name, rating (1-5 stars), review text, date
- Respond to reviews inline (saves response text and timestamp)
- Metrics: average rating, total reviews, response rate, 7-day trend

7.2 Planned Capabilities

- Facebook, Yelp, TripAdvisor review aggregation
- Per-location review channel configuration
- Automated review response suggestions

7.3 Review Channel Configuration

Configured per location in Settings → Brands → Location detail:

- Google: requires google_place_id and gmb_link
- Each channel: enabled/disabled toggle, platform-specific URLs

8. Contacts Module

8.1 Contact Management

Contact list with: name, email, phone, brand, location, preferred channel, language, status, tags. Add/edit contacts manually. Contact detail modal with full history.

8.2 CSV Import with Upsert

- Upload CSV file
- Auto-detect columns: first_name, last_name, email, phone, preferred_channel, preferred_language
- **Deduplication:** Check for existing contact by email (primary) or phone (secondary) within same brand
- **Upsert behavior:** Update existing records, insert new ones
- Toast shows: “X added, Y updated, Z errors”
- Import history: separate “Added” and “Errors” columns

8.3 Duplicate Detection

- Scan for contacts sharing email or phone within same brand
- Auto-select oldest contact (earliest created_at) as primary
- “Set as primary” dropdown for manual override
- “Merge” per group or “Merge All” for bulk resolution

8.4 Tags System

- Global tag list for organizing contacts
- Assign/remove tags per contact
- Filter contacts by tag

8.5 Unsubscribe Management

- Separate “Unsubscribed” page listing contacts with unsubscribed_at set
- Unsubscribed contacts excluded from survey sends

9. Communication Module

9.1 Templates

- Email and SMS templates per brand
- Template fields: name, type, subject (email only), body, variables
- Variable system: {{first_name}}, {{last_name}}, {{brand_name}}, {{survey_link}}, etc.
- Usage count tracked per template

9.2 Automation Rules

Create rules that trigger based on survey responses:

Setting	Options	Default
Trigger Group	Promoters, Passives, Detractors, All	All
Feedback Condition	With feedback, Without, Either	Either
Channel	Email, SMS	Email
Delay Hours	0–720 hours	0
Throttle Days	0–365 days	0

- Activate/deactivate rules
- View automation logs with status and skip reasons

10. Settings Module

10.1 Profile

- Edit name, email, phone, timezone
- Avatar upload

10.2 Brands & Locations

- View/manage brands (super_admin only)
- Per brand: name, logo, subdomain, color scheme
- Per location: name, address, phone, timezone, GMB link, Google Place ID
- Review channel configuration per location

10.3 User Management

- Invite users: email, name, role assignment
- Brand and location access assignment
- Edit user roles and access
- Suspend/reactivate users

10.4 RBAC Permission Matrix

5 built-in roles with per-section permissions across 10 application sections:

Section	Super Admin	Brand Admin	Clinic Manager	Staff	Read Only
Dashboard	Edit	Edit	View	View	View
Responses	Edit	Edit	Respond	View	View
Sent Logs	Edit	Edit	View	View	View
Manage Events	Edit	Edit	View	No Access	No Access
Integration	Edit	Edit	No Access	No Access	No Access
Reviews	Edit	Edit	Respond	View	View
Contacts	Edit	Edit	Edit	View	View
Templates	Edit	Edit	View	No Access	No Access
Brands	Edit	View	No Access	No Access	No Access
Users	Edit	No Access	No Access	No Access	No Access

Custom roles can be created with granular per-section permissions (no_access, view, edit, respond).

11. Resources Module

- Admin-managed content library: playbook, guides, documents
- Resource types: document, guide, playbook
- Brand-level access control via junction table
- Rich text content or file URL
- Status: published / draft

12. Success Metrics

12.1 North Star Metric

Patient Feedback Loop Closure Rate

The percentage of detractor responses (NPS 0–6) that receive a follow-up action (internal note, automation trigger, or manual outreach) within 48 hours of submission.

- **Target:** >80% closure within 48 hours
- **Measurement:** Compare detractor response timestamps against first action timestamp

12.2 Module KPIs

Module	KPI	Target	Red Flag
NPS Surveys	Response rate (completed/sent)	>30%	<15%
NPS Surveys	NPS score trend	Improving MoM	Declining 3+ months
Distribution	Automated vs manual send ratio	>70% automated	<30% automated
Distribution	Delivery success rate	>95%	<85%
Feedback	Time to first action (detractors)	<24 hours	>72 hours
Feedback	AI categorization override rate	<20%	>50%
Reviews	Google Review reminder conversion	>15%	<5%
Reviews	Average star rating	>4.0	<3.5
Contacts	Import success rate	>95%	<80%
Contacts	Duplicate merge rate	Trending down	Growing
Platform	DAU/MAU ratio	>40%	<15%

12.3 Reporting Cadence

Cadence	Report	Audience
Daily	Detractor alerts, delivery issues	Clinic managers, staff
Weekly	NPS trend, response volume, review activity	Brand admins
Monthly	Full KPI dashboard, automation performance	Super admins, leadership
Quarterly	Feature adoption, platform health, benchmarks	Product team, executives

12.4 Feature Success Checklist

When evaluating any new feature, assess against these criteria:

- Does it increase survey response rate?

- Does it reduce time-to-action on detractor feedback?
- Does it shift manual work to automation?
- Does it improve data quality (fewer duplicates, more complete contacts)?
- Does it increase admin user engagement with the platform?

Appendix A: Key Workflows Summary

A.1 Survey Lifecycle

Create Event → Configure Questions → Set Consents → Design Thank You → Publish → Distribute (Manual/Auto) → Collect Responses → Analyze & Act

A.2 Contact Import Flow

Upload CSV → Parse Rows → For Each Row: Check Email/Phone Match Within Brand → Update if Exists / Insert if New → Log Results → Show Summary Toast

A.3 Feedback Response Flow

Detractor Alert → Open Response Detail → Review Score + Answers → AI Categorize or Manual Tag → Add Internal Notes → Trigger Follow-up (Manual or Automated)

A.4 Automation Rule Execution

Survey Response Received → Check Score Group Match → Check Feedback Condition → Check Throttle → Schedule Send (with delay) → Execute Send → Log Result
